

NGF Construction is a premier provider of specialty electrical & instrumentation (E&I) services for all process industries, with an emphasis in Oil and Gas. Our E&I division's goal is to provide our clients with the highest level of service and quality, while focusing on safety and efficient completion of each project.

Instrumentation

- Instrument Installation and Procurement
- Instrument Calibration
- Loop Check
- Start Up Assistance
- Control Panel, DCS/PLC Installation and Testing
- Heat Tracing Panels and Sensors
- Tubing Installation and Testing
- Gas Analyzer Installation, Maintenance and Testing

Communications

- Communication Cable Termination and Testing
- CCTV and Integrated Security Surveillance
- Remote Telecommunications
- Communication Networks
- SCADA and Remote Communication and Automation
- Public Address and General Alarm (PAGA)

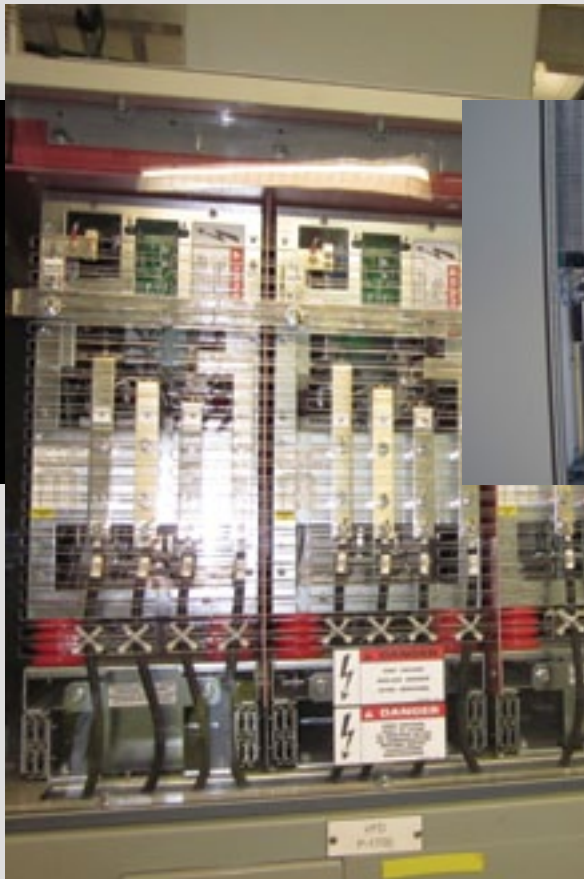

Commissioning

- Engineering and Pre-Construction Assistance and Support
- PSSR/PSM Documentation Development and Management
- Field Red Line Control and Turnover

Safety Services

- Fire and Gas Detection and Suppression
- Emergency Management Warning and Notification Systems
- Plant Paging and Alarm Systems
- Cathodic Protection Inspection
- Plant Ground Grid Compliance Testing

COMPREHENSIVE
ELECTRICAL
AND
INSTRUMENTATION
CAPABILITIES

Electrical

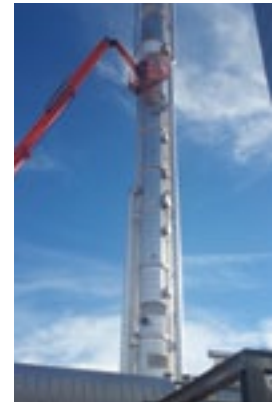

- High Voltage Wiring Installation and Testing
- Low Voltage Wiring Installation and Testing
- Raceway Installation (Cable Tray and Conduit)
- Power, Controls, Grounding, Lighting
- Electrical Equipment Installation
 - o MCCs
 - o Switchgear
 - o Transformers
 - o Lighting Panels
 - o Lightning Protection

NGF Construction's immediate access to both engineering and fabrication services provides the ability to pull together as-needed resources for civil, electrical, mechanical and process engineering. Our in-house capabilities also extend to the fabrication of skid assemblies, pressure vessels, piping and structural steel and cold boxes.

PROJECT MANAGEMENT EXPERTISE

At NGF we realize that not all projects are the same. This is why finding an effective balance between scope of work, time, quality, and budget is one of the highest priorities for our project managers. Our goal is to plan, organize and optimize the allocation of resources to meet your project specific objectives.

A RICH
HISTORY
OF
SUCCESS
AND SAFETY

CONSTRUCTION SERVICES

Offering complete EPC services means NGF Construction has the experience and expertise to provide an array of service capabilities that include:

- Construction, project, safety and subcontractor management
- Civil construction
- Structural steel and pipe fabrication and installation
- Pressure testing and equipment installations – including vessels, skids and compressors
- Inventory and QA/QC document control
- Plant maintenance
- Full commissioning and/or shutdown services

SAFETY MANAGEMENT

NGF takes our safety responsibility very seriously, both the safety of our employees as well as of our customers. NGF is an ISNetwork and DOT program member and we have authorized OSHA 500 corporate trainers on staff. NGF maintains an on-site safety representative and conducts daily tool-box safety meeting with JSA forms recorded daily.

We provide all documentation and testing required to meet PSM and DOT requirements. We pride ourselves in providing quality work and delivering a final product that exceeds our clients' expectations.

THE NGF CONSTRUCTION COMMITMENT

NGF strives for continuous improvement and prides itself in exceeding the expectations of our customers through integrity, a highly skilled workforce and hard work. We are committed to maintaining a safe environment for both our employees and the community. It is our goal to build lasting client relationships.

NGF Construction and our entire family of companies are committed to the success of your next project and we look forward to the opportunity to work with you in the future.

DIVERSIFIED PROJECTS

Companies working with NGF Construction benefit from our diversified work experience. With construction project history ranging from \$100,000 to full EPC projects exceeding \$100 million, our past projects have included midstream turbo expander plants; cryogenic NRU facilities; compressor stations; crude oil gathering terminals and off-loading stations; tank farms/batteries; and plant expansions, remodels, maintenance, shutdown services and decommissioning. We have the resources to help make your next project a success.
